

Pohištvo za dnevne sobe in predsobe "asia touch" z lahkotno krivino rešuje monotonost regalov. Krivina ob prehodih ergonomsko odpira prostor človeku in mu dodaja vrednost, obenem pa neznatno zmanjšuje uporabni prostor regala v primerjavi z konvencionalno ravno izvedbo. Krivina pritakne pohištvu tudi možnost elegantnega moduliranja. Serija pohištva vsebuje: male in velike komode, male in velike klopi in regale.

With lightly curve "asia touch" furniture inspire life into conventionally dull racks. The asia curve also ergonomically opens up spaces near corridors adding value to space. At the same time the deduction of storage on the racks is negligible. The curve adds options of modularibility to the series which includes various chests, benches and racks.
